

# PA 307.4.1 - Practice Assignment - Design Online Resume using HTML and CSS

---

## Assignment Objective

In this assignment, you will build your online resume with HTML and CSS.

## Requirements

The idea is to develop a responsive web resume that you can show to any employer that you want to work for. The screenshot below will give you an idea of how an online resume should look.

 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat.

**Lorem Ipsum is simply dummy text** 1996 - 2000  
 Graphic Design  
 Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur.

## Suggested Steps:

1. This may seem overwhelming, but do not worry; we will accomplish it in single steps. For this first step, you just need to lay out the structure of the first section of the resume, which includes an image, your full name, your title, some general information, and a biography. You can always go back and restructure the html.

For now, let's think of one possible structure for this section. Of course, you are welcome to follow your own creative structure:

- a. Think of the entire resume inside a big container. Let's name the container "**main\_container**."
  - b. Inside **main\_container**, we can have a section where we can put all of the information required for this step. Let's name it "**section1**."
  - c. Now inside **section1**, the simplest way to see it is by visualizing three boxes:
    - Box 1) image, full name, and title;
    - Box 2) general information, and
    - Box 3) biography.
  - d. Go ahead and start implementing these boxes, and include the relevant information within them. After that, play around with the CSS. Although we have not learned about the "display" property of CSS, it is pretty easy to understand, and we encourage you to research it.
2. Now that you see more of CSS such as class, id, selector precedence, display, and position, it is time to move forward. Before we move forward, perform a search on the `<aside>` tag and the `<hr />` tag.

3. Now, almost the same thing applies here from Step 1. Think about the section that has “EMPLOYMENT” and “EDUCATION” in one container, and the section with “PROGRAMMING SKILLS,” “GRAPHIC SKILLS,” and “LANGUAGE SKILLS” in another container. This is about creating the correct structure inside the two containers. *Hint: the container with the percentages and the circles are all boxes that are styled correctly! Go ahead and let your creativity shine.*

4. Now that you have the structure ready, begin styling your online resume to look more like the photo above. When styling your resume, use five different ways of selecting an HTML element (including id, and class). If you have been using internal styling, move everything to an external style sheet.
